## INTRODUCTION

The COVID-19 pandemic, caused by the novel coronavirus SARS-CoV-2, has emerged as one of the most significant global health crises of the 21st century, profoundly affecting societies worldwide.

The impact of the COVID-19 pandemic on society has been profound and multifaceted, affecting nearly every aspect of daily life around the globe. Numerous studies have been conducted to analyze these impacts from various perspectives.

Through this case study, we tried to reach out many people how the after effect of Covid 19 affected their life. What all changes it have made etc.

## METHODOLOGY

This case study is conducted by online survey asking questions regarding Covid impact to people. Mainly how it changed their life style and whether they got recovered mentally and physically.

## RESULTS/FINDINGS

**This survey shows that all over the pandemic have bad effects on people. Still they are aware of the situation and ready to take actions regarding that.**  
**By knowing the importance most of them completed their vaccination.**

## ANALYSIS

Most of the people who participated in this survey are of age groupm from 18-24. For most of the people the pandemic was only disrupted somewhat. For most of them their lifestyle has changed that includes sleeping pattern, other activities. Most of them says that the pandemic brought negative effects on them .By knowing the importance 90 percentage of population has vaccinated and believe that there is a very high chance of another break out for other pandemi

## FREQUENCIES
